

#### PRESSURE TRANSDUCER / TRANSMITTER

# Models 245 / 345 DIGICOMP

#### **FEATURES**

- High accuracy
- Small size and weight
- Many options available
- All stainless steel construction
- 3 to 5000 PSI (0.2 to 345 bar)
- Isolated Shunt calibration circuit
- Zero and Span adjustments

#### **TYPICAL APPLICATIONS**

- Engine test stand
- Turbine-rocket
- Diesel-internal combustion
- Emission testing
- Production test stand
- Transmission testing
- Break Strength testing

#### STATE-OF-THE-ART CIRCUITRY DELIVERS HIGH ACCURACY

Viatran's 245 and 345 are our most accurate pressure transducers for industrial test and research applications. The 245/345 measures from 3 PSI to 5000 PSI (0.2 to 345 bar) with standard linearity of  $\leq \pm 0.06\%$  FSO.

To achieve high static accuracy and low temperature errors, Viatran uses ASIC technology with integrated EEPROM to store corrective coefficients. Digital connection allows Viatran to offer optional temperature compensation in the range of -40°F to 170°F (-40°C to 77°C) and linearize the signal down to 0.06% FSO or less without sacrificing the <2ms response time of the unit.

#### COMPACT SIZE FOR LIMITED SPACE APPLICATIONS

The compact size of the 245/345 allows more transmitters to fit into a smaller space so that more pressure points can be measured. The use of surface mount technology (SMT) allows this complex circuitry to be incorporated into a small package. Also included is an isolated internal calibration signal circuit. This feature allows calibration of the transmitter without an external pressure source and minimizes the need to send the transmitter to a metrology lab.

#### **CIRCUIT PROTECTION**

To maintain excellent performance and ensure immunity in electrically noisy environments, both mechanical and electrical designs are optimized for EMI handling. Sample devices were extensively tested in a simulated environment allowing for the development of a more reliable and robust product.

#### **OUR COMMITTMENT TO QUALITY**

The "X45" series design will perform and maintain on site durability in the most severe applications. To satisfy your unique application requirements, Viatran will also modify our standard products to meet your needs.

Viatran's vision is to be your fastest, easiest and most trusted solution.
