SMART. RANGEABLE. ACCURATE.

Each Viatran Model 948 is digitally calibrated in the factory. This ensures unsurpassed accuracy and rangeability down to 10" WC. HART communications allows for easier system commissioning, especially at start up. All of this in a small package ideal for the most rugged process applications.

REMOTE CALIBRATION

The HART communication system allows for simultaneous analog and digital communication. This means the Model 948 is fully compatible with existing analog systems while still offering the benefits of digital/remote calibration and communications. Communicating with the 948 can be

accomplished with a handheld device or using a PC and available software.

OPTIONAL APPROVALS

The Model 948 is all welded stainless steel which makes it perfect for corrosive environments. It can also be marked with FM, CSA and ATEX hazardous location markings.

FOR BETTER RIG REAL ESTATE

When Rig Real Estate is at a premium, the Model 948 is an excellent solution. Its small size (1.5" diameter) and all-welded 316 stainless steel construction offers durability both on and off the rig.
