#### STATE-OF-THE-ART DESIGN DELIVERS NEEDED ACCURACY

Viatran's 24A and 34A are one of our most versatile pressure transducers / transmitters for industrial applications. The 24A / 34A measures from 3 PSI to 5000 PSI (0.2 to 345 bar) with standard linearity of  $\leq \pm 0.25\%$  FSO.

Improved linearity of  $\pm 0.15\%$  or  $\pm 0.10\%$  FSO are available as options.

#### ISOLATED SHUNT CALIBRATION OPTION

Also available is an isolated calibration signal circuit. This option allows calibration of the transmitter without an external pressure source and minimizes the need to send the transmitter to a metrology lab.

#### **CIRCUIT PROTECTION**

To maintain excellent performance and ensure immunity in electrically noisy environments, both mechanical and electrical designs are optimized for EMI handling. Sample devices were extensively tested in a simulated environment allowing for the development of a more reliable and robust product.

#### **OUR COMMITTMENT TO QUALITY**

The "X4A" series design will perform and maintain on site durability in the most severe applications. To satisfy your unique application requirements, Viatran will also modify our standard products to meet your needs.

Viatran's vision is to be your fastest, easiest and most trusted solution.
